# MINIMUM VIABLE MOMENTUM

---

Turn one priority into  
an action small enough to repeat.

# Minimum Viable Momentum

A dramatic reset can feel powerful. A smaller action you can repeat is usually more useful.

## START WITH ONE PRIORITY

**What outcome matters most during the next seven days?**

---

---

---

**What is the smallest completed action that would count as real progress?**

Make it observable. 'Work on it' is vague; 'draft the first paragraph' is visible.

---

---

---

**When and where will this action happen?**

---

---

# Build the repeat

Use the boxes to record evidence. A checked box means the action was completed - not that the day was perfect.

| DAY | THE ACTION | DONE | WHAT HELPED OR GOT IN THE WAY |
|-----|------------|------|-------------------------------|
| 1   |            | [ ]  |                               |
| 2   |            | [ ]  |                               |
| 3   |            | [ ]  |                               |
| 4   |            | [ ]  |                               |
| 5   |            | [ ]  |                               |
| 6   |            | [ ]  |                               |
| 7   |            | [ ]  |                               |

What should I keep, change, or stop next week?
